[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years
Occupant of heavy transport vehicle or bus involved in collision with other motor vehicle (V62-V64,V69,V72-V74,V79)

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years
Occupant of heavy transport vehicle or bus involved in collision with other motor vehicle (V62-V64,V69,V72-V74,V79)

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	All ages	Under 1 year	1-4 years	5-9 years	10-14 years	15-19 years	20-24 years	25-29 years	30-34 years	35-39 years	40-44 years	45-49 years

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable III. Deaths from 358 selected causes, by 5-year age groups, race, and sex: United States and each state, 2007

[Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2007, multiple-race data were reported by California, Connecticut, Delaware, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2007 data-mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004), area, race, and sex	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated
