RE: Docket #005 Public Comments:
Request for Extension of Comment Period Related to RIN 0920-AA10 Approval Tests
and Standards for Closed-Circuit Escape Respirators; Notice of Proposed Rulemaking

Dear Mr. Rehak and NIOSH Docket Officer:

CSE Corporation manufactures the SR-100, a closed-circuit escape respirator approved for use under 42 CFR Part 84 that is widely used in the mining industry. As a manufacturer whose products would be subject to the rule being developed in this rulemaking, CSE is very much interested in submitting comments to the proposed rule.

CSE personnel attended the March 23 public meeting held in this rulemaking and are actively reviewing the information provided in the meeting. Because the meeting was held only recently and due to operational demands, CSE would like to request that the public comment period be extended for an additional 30 days in order to provide sufficient time to fully analyze the information presented in the meeting and the notice of proposed rulemaking and to prepare substantive comments.

If you have any questions, I may be reached at 412-856-9200. We appreciate your attention to this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'S. Shearer'.
