## About this Document

This document includes all core and standard questions available for the Pregnancy Risk Assessment Monitoring System (PRAMS) Phase 8 questionnaire that are currently being used by one or more states, and is organized by topic. Many questions contain response options that are related to more than one topic, but are listed under the primary topic. Additional questions on a topic that are not in current use can be found in the Phase 8 Standard Document.

Within each topic or sub-topic, questions are organized into two categories: Core and Standard. Core questions are listed sequentially within a topic, with the question number from the basic core questionnaire. Likewise, standard questions are listed sequentially within a topic, with the number of the standard question cited. All questions are shown in English and are in the form used in the self-administered mail questionnaires. Interviewer-administered versions and Spanish translations are also available.

To identify which states used the various standard and state-developed questions, refer to the list under each question that has state abbreviation and the number of the question on that state's survey. For example, RI76 corresponds to the Rhode Island (RI) survey question number 76 on their Phase 8 survey. The same question may have a different number in another state. It may also be listed as SC79 because South Carolina may have added additional question before it.
